Description of EMRP SIB 63 “Force traceability within the meganewton range”

Authors Mikołaj Woźniak - Central Office of Measures (Główny Urząd Miar)

[force traceability](#) [force transducers](#) [project EMRP](#)

Abstract

This paper’s aim is to explain the objectives and planned results of the project EMRP SIB63 “Force traceability within the meganewton range” and scope of participation of the Central Office of Measures. Essential test of force transducers and “build-up” systems have been performed. Results have been initially analyzed.
