Description of the JCGM GUM-6: 2020 Guide concerning the use of the measurement models in evaluation of measurement uncertainty

Authors Paweł Fotowicz - Central Office of Measures (Główny Urząd Miar)

[guide](#) [measurement model](#) [measurement uncertainty](#)

Abstract

The article discusses the basic principles for creating the measurement models presented in a new document published by the Joint Committee for Guides in Metrology. The aim of the article is description of the main ideas expressing in this Guide. The document is an important material that can be used in testing, calibration and scientific laboratories.
